

**Job Title:** Data Engineer

**Company:** Evangadi Tech

**About Us:**

Evangadi Tech is an agency building a team of talented developers, committed to delivering high-quality software solutions to clients worldwide. By emphasizing on quality, collaboration, and continuous improvement, we aim to create a team capable of competing with the best in the industry.

**Job Description:**

We are seeking a highly skilled and experienced Data Engineer to join our team. The successful candidate will be responsible for designing, developing, and maintaining data pipelines and architectures to support our clients' business needs. Additionally, the candidate will develop courses and training materials to assist team members, students, and clients in learning how to use and develop data-driven solutions.

This role requires a strong understanding of data engineering principles, development best practices, a commitment to delivering high-quality solutions, and a passion for teaching and mentoring others.

**Key Responsibilities:**

- Design, develop, and maintain robust data pipelines to meet business requirements.
- Implement and manage ETL processes to ensure efficient data extraction, transformation, and loading.

- Create and maintain data visualizations and reports using PowerBI to support business decision-making.
- Collaborate with data analysts, data scientists, and business stakeholders to understand data requirements and deliver solutions that meet their needs.
- Optimize and troubleshoot data workflows to ensure high performance and reliability.
- Ensure data quality and integrity across all data processes by implementing best practices and regular audits.
- Document data processes, configurations, and procedures to facilitate knowledge sharing and maintain compliance.
- Develop training materials, provide training, create documentation, and conduct knowledge transfer sessions.
- Mentor junior team members and provide technical leadership and guidance when needed.
- Stay up-to-date with the latest data engineering technologies and trends.

## **Requirements:**

- Bachelor's degree in Computer Science, Information Technology, Engineering, or a related field is preferred.
- Proven experience as a Data Engineer with a strong portfolio of successful projects.
- Strong knowledge of data engineering principles, ETL processes, and data architecture.
- Proficient in programming languages such as Python, SQL, and Scala.

- Experience with big data technologies such as Hadoop, Spark, and Kafka.
- Familiarity with cloud platforms such as AWS, Azure, or Google Cloud.
- Excellent problem-solving and analytical skills.
- Strong communication and interpersonal skills.
- Ability to work independently and as part of a team.
- Certification in PowerBI or related technologies is a plus.

## **Job Type:**

- Full-time

## **Benefits:**

- Competitive salary and benefits package
- Opportunity to work with a talented and visionary team
- Professional growth and development opportunities
- Flexible work environment

## **Application Deadline:**

- June 30th, 2024

## **How to Apply:**

Interested candidates are invited to submit their resume, cover letter, and portfolio to [jobs@evangaditech.com](mailto:jobs@evangaditech.com). Please include "**Data Engineering Application**" in the subject line.

**Work Location:** Addis Ababa, Ethiopia
